

Certis CISCO, Singapore

Auxiliary Police Force HQ

Certis CISCO has been a ProMedUSA client for many years. With the advent of the Covid-19 pandemic, and Singapore's gradual transition into the "endemic" stage of returning to a normalized lifestyle, Certis wanted to assure their staff that they were taking appropriate measures to protect their employees who were returning to the office after working from home for months.

AtmosAir's bi-polar ionisation air purification system is being gradually installed in their Headquarters building to help protect Certis employees and associates from illnesses, dust and pollutant particles (PM10, PM2.5, PM0.3), Allergens, VOC's, Bacteria, Germs and Viruses.

Here you see the first of many SGFC-400 Bipolar ionization units being installed in their HQ cassette aircons.
